EDUCATION

Prairie View A&M University Prairie View, TX
Bachelor of Engineering In Computer Science Expected May 2027
Relevant Coursework: Data Analysis, Software Engineering; Operating Systems; Algorithms, Artificial Intelligence
Computer Science:Data Structures, Computer Organization, Web Design, Discrete Structures,Software engineering,Ethics In Computing,Database Management,Artificial Intelligence,Information Retrieval

TECHNICAL SKILLS

Technical Skills: Python, C++, JavaScript/TypeScript, Java, SQL, HTML/CSS.
Frameworks: PyTorch, React, Next.js, Flask, Three.js, Node.js,tool use,mcp,astrolabe,etc etc
AI / LLM: Anthropic Claude API, OpenAI API, Cursor, RAG, agentic workflows, prompt engineering,Antigravity,braintrust,Evals
Data / Tools: Pandas, NumPy, Matplotlib, Plotly, scikit-learn, Supabase, Git/GitHub, Linux, VS Code,Obsidian,braintrust,datadog,airtable

WORK EXPERIENCE

SWD— The Walt Disney Company Orlando, Fl
Software Developer Summer 2026 - Summer 2026

- Developed and maintained evaluation systems for machine learning models, enabling systematic measurements of model quality, accuracy, and performance
- Built automated evaluation pipelines and benchmarks to detect regressions and validate model behavior before deployment
- Analyzed evaluation results and surface insights to guide model iteration and improvement decisions
- Collaborated with engineers and data scientists to define evaluation criteria and expand test coverage across model use cases

LSAMP Research Prairie View, TX
AI research assistant Fall 2024 – spring 2025

- Researching efficiency improvements for neural networks using PyTorch.
- Analyzing hardware limitations and developing pruning techniques to optimize model performance.
- Demonstrated structured pruning reduced neural network inference time by up to 45% without significant loss of accuracy.
- Benchmarked GPU vs CPU performance, showing a 6x speedup for deep learning model training using parallel processing.

SC Capital Quantitative Research Remote
Quantitative Researcher Fall 2026-Spring 2027

- Building and maintaining research databases that support institutional market research and systematic trading strategy evaluation
- Developing Python tools and statistical models to process market data, evaluate trading strategy performance, and visualize quantitative research findings
- Studying macroeconomic indicators and intermarket relationships to support hypothesis testing and research initiatives
- Collaborating directly with hedge fund CIO and Ph.D. Research Director to contribute to real portfolio research questions and investment decisions

PERSONAL PROJECTS

Hackathon Experience United States
Hackathon Participant 2023-Present

- 1st in Sandia Labs x Pvamu Hackathon,Finalist in **Vista Agentic AI Hackathon**,
- Placed **4th overall** in **InternXL Hackathon** and **3rd overall** in **Apple Propel Hackathon** among thousands of applicants
- Developed innovative, real-world solutions leveraging AI/ML and agent-based system design
- Collaborated in fast-paced team environments to design, build, and present functional prototypes within tight deadlines

Terrasite — Environmental Intelligence Platform Spring 2026 - Present
Founder · Builder · 2026

- Built an **interactive 3D globe platform** that scores global locations across six environmental categories using public data and analytical modeling.
- Stack: **Three.js + Claude API** with multi-source data integration for real-time site scoring and visualization.
- Designed a **two-sided marketplace** connecting eco-focused teams with impact investors, plus **API licensing** for enterprise data access.
